

How to make my Snowman

By: 8A

1. First go to the pencil and then make the fill color white and make the line color black, then make a circle that is about 3 ½ in. horizontally and 3 in. vertically.
2. Make another circle about 2 ½ in. horizontally and 2 ½ in. vertically and make the first snowball overlap this one by ½ a centimeter.
3. Make another circle about 1 ¼ in. horizontally and 1 in. vertically and make the second snowball overlap this one by 1 centimeter.
4. Make the fill color black now, then put six little black circles on the smallest snowball you made, forming into a smiley face.
5. Then put one little black circle in the middle for the nose, about half a centimeter above the smile.
6. For the eyes, it's going to be sunglasses, so make a black line (make the line size 8) across the first circle. Then, with the first centimeter of the black line, make a box, then make another one about a centimeter from the left.
7. My snowman is going to be like a "rapper", so, for the hat, it's going to be a sideways ball cap. The color you're going to use is #00ff00 (The line size is 8). It's a green color. Start making a line around where the ear should be on a human, only on the snowman. Start going around and above the head. Then stop a little after halfway. Then make a hump to the right of the snowman's head, and end right across where you started.
8. On the second ball, we're going to make a necklace on the snowman. First, we're going to make a yellow line (#ffff00 the line size is 7) and start making the line at the left side at the top of the ball, making the line kind of wavy. Then end at the right side of the ball, at the top again.
9. In the middle of the necklace, using the same color you used for the hat, but this time make the line size 7, you need to make an S in the middle of the necklace. Then make the line size 4 and make two lines in the S, one to the left of the middle in the S, then make one two the right of the middle in the S. This may sound confusing, but if you go back and read it slower, it will be easier.
10. Next, we're going to make the arms. Using brown(#660000 line size 10) about a centimeter from the necklace, make a line going diagonally to the other side of the second snowball. Then you need to make two brown lines (opposite sides) about a centimeter from the end of the stick making three fingers. Then make another arm starting from the other side of the snowball, making the fingers again on this one.
11. Make a black circle about four centimeters long on the top right side of the page. Then, using a pink(cc0066) make a circle, about a centimeter in width, in the black circle, anywhere you want. Then keep on doing this with an orange(ff3300), with a blue(3300cc) with a yellow(ccff00), with a red(ff0000) and with a green(33ff00).
